## WHO WE ARE

Drive Control Systems (Pty) Ltd is a company founded in 2016 by Dane Nel. The company offers a range of services related to industrial automation and control systems, including the design and implementation of PLCs (Programmable Logic Controllers), Variable Speed Drives, MCCs (Motor Control Centers), and Electrical Control Panels. We also specialize in AC induction motors, soft starters, direct online starters, braking resistors, and HMIs.

With a team of experienced professionals, Drive Control Systems (Pty) Ltd is committed to providing high-quality solutions that help their clients optimize their manufacturing processes, increase efficiency, and reduce downtime. They are dedicated to delivering personalized service and ensuring customer satisfaction, no matter the size or complexity of the project.

## OUR MISSION

At Drive Control Systems (Pty) Ltd, our mission is to provide innovative and cost-effective solutions for our clients' industrial electrification control system needs. We strive to deliver exceptional service by collaborating closely with our clients to understand their unique requirements, and then designing and implementing tailored solutions that meet their specific needs.

## OUR VISION

At Drive Control Systems (Pty) Ltd, our vision is to be a leading provider of industrial automation and control system solutions in our region, known for our expertise, innovation, and exceptional service. Our goal is to build long-term partnerships with our clients, becoming their trusted advisors and partners in their success.

## WHAT WE DO

Drive Contol Systems (Pty) Ltd specialize in distribution of variable speed drives, soft starters, electrical control panels, AC induction motors.

## Variable Speed Drives

At Drive Control Systems, we specialize in the distribution of top-of-the-line Variable Speed Drives from the world's leading manufacturers. Our products are designed to provide precise control and efficiency for your motor-driven applications, delivering reliable performance and energy savings for your business.

## Variable Speed Drives Range

### Speed Drive Models

CFW500  
CFW700  
CFW11  
CFW501 HVAC  
CFW701 HVAC  
Mw500  
AFW11  
AFW11M/AFW11W  
MVW01

### Speed Drive Model

G120P

### Speed Drive Series

CDI-E102  
CDI-EM60  
CDI-E100  
CDI-E180  
CDI-EC10

### Speed Drive Model

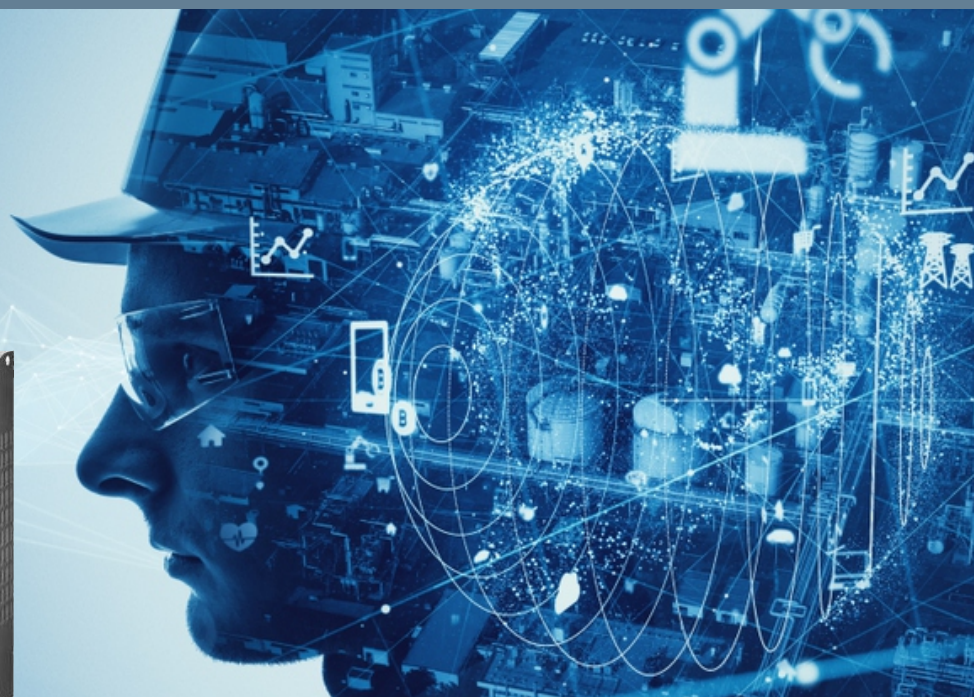

VACON 100 Series VFD  
VACON 20 Series VFD  
VACON NX Series VFD

Some of the Variable Speed Drives Brands We Offer

Service.  
Reliability.  
Transparency.

## Soft Starters

At Drive Control Systems, we offer a wide range of Soft Starters to meet your specific needs. Our product line includes:

### Soft Starters Types

PSR  
PSS  
PSE  
PST  
PSTB

### Soft Starters Brand

**ABB**

## Electrical Control Panels

Our electrical control panels are designed and manufactured to the highest standards, ensuring that they meet all applicable safety regulations and industry standards. We offer a wide range of control panel types, including motor control centers, distribution panels, and control desks, all of which are designed to ensure the smooth and efficient operation of your equipment.

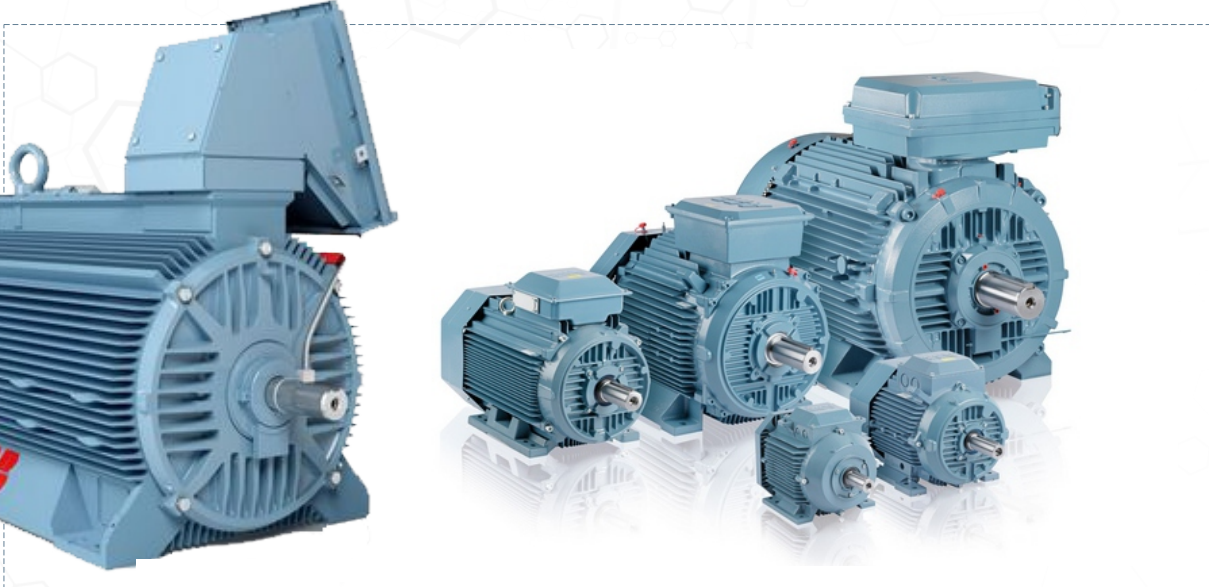

We offer a range of customization options to ensure that your control panel meets your specific needs. These options include:

- Various sizes and shapes to fit your space requirements
- Multiple door configurations for easy access and maintenance
- Various types of wiring, such as conduit or tray, to meet your wiring requirements
- A variety of materials, including steel, stainless steel, and aluminum, to meet your environmental needs

## AC Induction Motors

Our AC induction motors are designed and manufactured to the highest standards, ensuring reliable performance and long-term durability. We offer a variety of motor types, including single-phase and three-phase, as well as a range of power and speed options to suit your specific requirements.

Our team of experts will assess your needs and recommend the best AC induction motor for your application. We offer a range of customization options, including:

- Multiple mounting options to fit your space requirements
- Various sizes and speeds to meet your performance needs
- Different enclosures to protect your motor from environmental factors
- Various voltages to meet your power supply requirements
- Different levels of efficiency to save energy and reduce costs.
